

Focus Program

Choices for Secondary Students

Guitar Building

KCVI

Description

This is an activity-based course that will cover topics such as safe shop practice, the elements and principles of design, the use of jigs and templates, wood selection, shaping, joinery, finishing techniques, and electronics. This program is open to all senior students, and no previous woodworking experience is required.

Student fees will vary based on individual choices in material selection, hardware, and electronic components.

Students learn the skills necessary to achieve the highest standard of craftsmanship while building their own instrument. They can also build a portfolio for post-secondary destinations that include college, apprenticeship or the world of work. Interested students can identify to earn certification and further activities related to the Specialist High Skills Major in Arts and Culture.

Graduates of this program may qualify for preferred entry into Sheridan College.
